

Higher-order stress derivatives along the path (MPa)

shaded: the material has yielded. Before yield the response is linear and these vanish exactly.

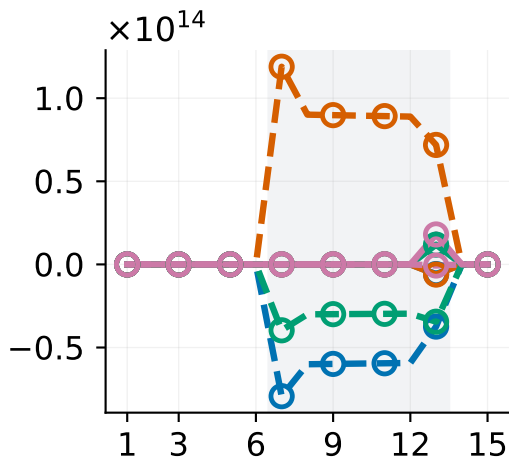

order 2: $\partial^2 \sigma$

order 3: $\partial^3 \sigma$

order 4: $\partial^4 \sigma$

- σ_{11}
- σ_{22}
- σ_{33}
- σ_{12}
- repeated, $\partial^n / \partial \epsilon_{11}^n$
- mixed, also in ϵ_{22}
- OTI (exact)
- 80-digit reference

increment along the loading path
