NSTATV

1

-

+

Material properties, one per line, in PROPS order

200000
0.3
250
2000

Differentiated parameters, one per line as name=PROPS index ?

E=1
nu=2
sy0=3
H=4

State variable names, one per line, in STAT EV order

EQPLAS

4. Derivative products and loading history

Requested products

- ☐ DDSDE
- ☒ INTERNAL_JACOBIAN
- ☐ HIGHER_ORDER_STRESS
- ☒ DSIGMA_DP
- ☒ DSTAT EV_DP

Highest stress-derivative order

4

Loading history

Supplied loading history

Uniaxial strain, 20 x 1e-4 (small strain)

Provenance: `parameter_sensitivity/loading_paths.json`
default

20 increments
