

Higher-order stress derivatives against an independent reference

relative difference from the
80-digit reference (dimensionless)

- repeated directions
- mixed directions

the reference resolves these values only to $8e-06$;
everything below this line is indistinguishable from it

10^{-4}
 10^{-6}
 10^{-8}
 10^{-10}
 10^{-12}
 10^{-14}
 10^{-16}

order 2

order 3

order 4

derivative order of the stress with respect to the strain increment
